

History at Hackwood Primary Academy

Intent

Through our history curriculum at Hackwood, we aim to support pupils to understand chronology and how time progresses. Pupils will build an understanding and respect for a myriad of time periods and how these interact with each other. Varied experiences will be enjoyed by pupils which will allow them to employ their **imagination** to develop a fascination with historical periods. We aim to support them to develop an understanding of the past to help them to make sense of the present and future. We will encourage pupils to use their **skills** to develop their knowledge of the significance of cause and effect within time periods. Our vision is to develop confident discussions about significant figures and events from history. Throughout history lessons, we provide the opportunity for **practical** exploration of historical artefacts or replica artefacts.
