

RE at Hackwood Primary Academy

Intent

Through our RE curriculum at Hackwood, we aim to create an open-minded, diverse learning environment for children to **enjoy** learning. We strive to **nurture** a safe space for sharing ideas and opinions with time for **reflection**. Pupils will be provided with teaching that enables an understanding and **investigation** of cultures, faiths and beliefs resulting in an understanding of each other and the wider world. Pupils will practise oracy skills so that children have the ability to discuss ideas with respect. We will provide **practical** research lessons for children to develop their own learning and be inspired by what they find.
