

Science at Hackwood Primary Academy

Intent

Through our science curriculum at Hackwood, we aim to build an understanding of the world around us through **investigation** and exploration. We **nurture** an environment of safe risks for scientific experiments and enquiry. Our aim is to instil curiosity and allow time for **reflection** of findings. We want to develop a range of practical and problem-solving skills to promote STEM skills for future careers. Pupils will develop a deeper understanding of cause and effect in the world and direct environment around them.

INSPIRE

Investigate nurture skills practical imaginative reflect enjoy
