

PSHE at Hackwood Primary Academy

Intent

Through our PSHE curriculum at Hackwood, we **nurture** the children through a happy and supportive environment by establishing clear rules through our Hackwood Values and Expectations. We aim to develop, strong, warm, and supportive relationships by encouraging the children to develop the **skills** to manage their emotions, developing a positive sense of themselves and learning how to make good relationships, co-operate, and resolve conflicts peacefully. The children will continually be encouraged to **reflect** upon their own strengths, weaknesses, and goals, discussing and giving practical advice with their peers to support their learning and development. At the beginning of each year each class will elect a class representative to develop an understanding of the aspects of democracy. Throughout the school the children will have fun and **enjoy** celebrating the similarities and differences of the children and staff that make up the Hackwood family, all laying the personal social and emotional foundations to support all aspects of learning.
